

Cafeto

Use Case

MA / MS My Agenda / Meeting Scheduling

Overview

6CONNEX is a hybrid events platform to sell the customer experience of virtual events.

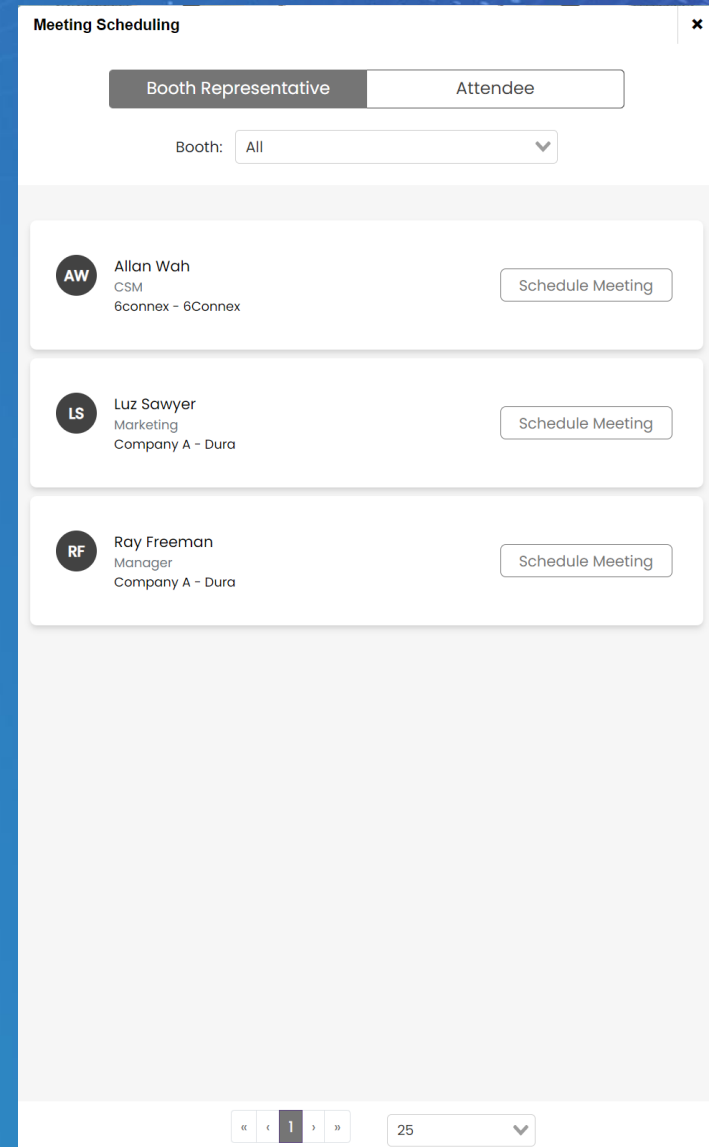

6CONNEX launches
My Agenda/Meeting Scheduling MA/MS.

MA/MS is a new feature to add to the 6CONNEX platform to improve the event organization.

What we did

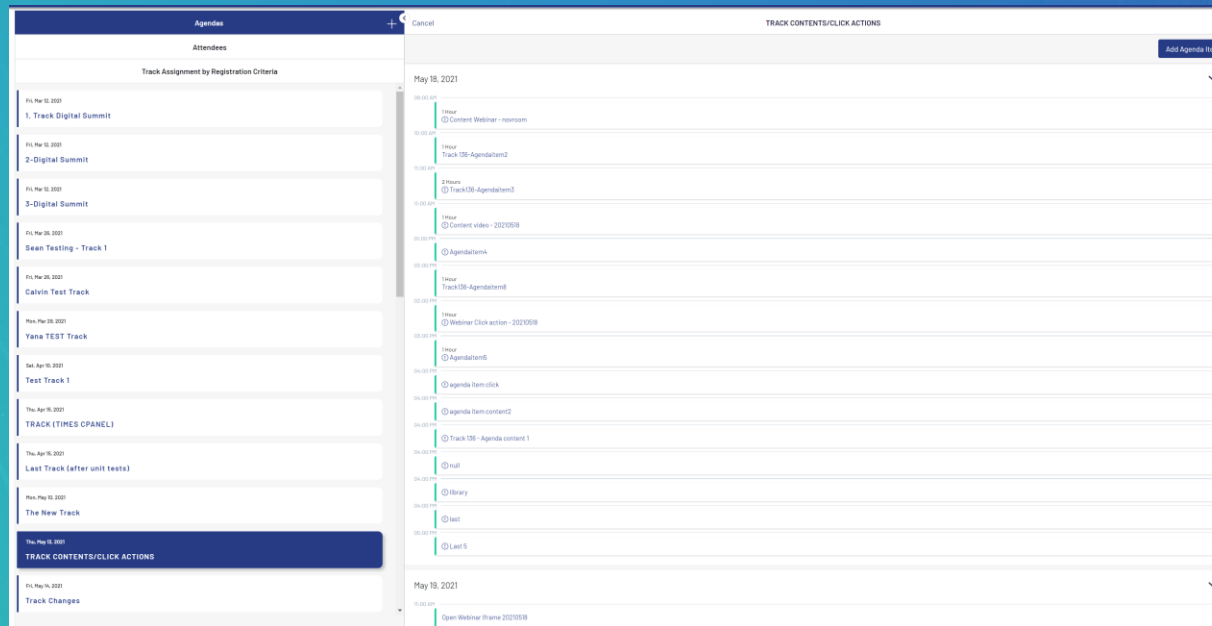

My Agenda/Meeting Scheduling MA/MS

- **My agenda:** links to the event agenda, platform contents and event schedule.
- **Meeting Scheduling:** attendees can schedule meetings with representatives of the event according to availability and can also schedule meetings with other attendees of the event.

The Process

- **First phase -> Meeting Scheduling** was only made for scheduling meetings with representatives of the event.

- **Second phase -> Meeting Scheduling** was also made for scheduling meetings with other attendees of the event.

Tech Stack

Backend:  + 
Java Script Node js

Frontend: 
Vue

Challenges

- **Change in the normal type of service:** clients usually wait for their finished project and do not intervene, but in this case, **6CONNEX** carries out its own roadmap and guides the project. We work as partners.
- Software developments must always be integrated to the client's platform.
- Getting to know the tech stack and key people in a short time.

Results

Results

6CONNEX is constantly seeking to differentiate its product from competitors and make it visible to its customers.

- 6CONNEX achieves this with the MA/MS functionality; an **added value** compared its competitors:
 - ✓ At what time an event occurs
 - ✓ Manage your agenda as if it were a calendar
 - ✓ Export to each user's calendar

Testimony

I want to take a moment to send you a quick note regarding the performance of the Cafeto Software Factory team assigned to the Personal Agenda/Meeting Scheduling project. To put it plainly, their performance has been outstanding in every way. They have, with professionalism, cheerfulness, and great enthusiasm, tackled every challenge thrown their way. Instead of finding problems, they brought me solutions. They achieved more than I ever thought possible and their work has been outstanding. Each and every member of the team performed to the highest standard.
